Accessing Course Reserves within Canvas

The University requires that instructors share content (journal articles, book chapters, multimedia, etc.) for which they do not own the copyright through the Course Reserves system. You and your students can access the content directly from within your Canvas course under “Library Course Reserves.”

To access Course Reserves, follow these steps:

1. Log into Canvas.
   https://canvas.emory.edu/

2. Click on the Courses icon on the left of the home page and then the desired course.

3. Within the Course page, click on Library Course Reserves in the left navigation menu.

4. This opens Course Reserves within Canvas. You can view, modify, and create course materials in this window.
5. If the course is not in Course Reserves, you will be prompted to create the course. Before doing this, contact the Course Reserves team to troubleshoot the issue at reserves@emory.edu or 404-727-2230.

6. If you would like to know how to place items in Course Reserves, please refer to the Related Links section of the Course Reserves Overview page.
