

## Importing Search Results into EndNote *From PubMed*

Jason Puckett <[jason.puckett@emory.edu](mailto:jason.puckett@emory.edu)>

In PubMed (in your browser window):

- From the search result page, click the checkbox for each record you wish to download.
- Change the Display drop-down menu to "MEDLINE."
- Change the Send To drop-down menu to "File."
- Download the file when prompted.

In EndNote, with your library file open:

- Click File menu, Import. Click the Choose File button and select the file you created in the previous step.
- Click the Import Option dropdown menu. Choose Other Filters, then PubMed(NLM). (After the first time, you can skip the Other Filters step and choose PubMed directly from the dropdown.)
- Click the Import button.
